**Comments:**

Difficult conditions in Melbourne this evening. We had had a gigantic rain storm earlier in the day and everything was 'disturbed'. I tried calling QRP for the first fifteen minutes but was talking to myself.  
Thanks for the Contest. I look forward to the day when band conditions improve.

Conditions weren't very good, the noise was constant and I had some QSB, always at the most in-opportune time.  
I chose not to run QRP because of the poor band conditions.  
I had no VK4 contacts like I normally would, although I did make contact with one ZL4 Station and one VK5 Station, both had good signals.
